Innovative Maths Tools

Team of computer scientists, educational specialists and mathematicians are formed to create tools that will increase the pleasure of teaching and give students a new way to visualize and manipulate objects so abstract concepts become concrete and understandable.

Product:

- Cabri II Plus
- Cabri 3D v2

Interactive Math Exploration Centre is robustly involved in the provision of onsite school based Mathematics programs throughout the academic calendar. Working together with the respective schools, they have conducted many programs ranging from Mathematics Enrichment to Competition Training, Teacher Workshops to Parent Workshops and syllabus based courses such as Intensive Revision for the students. They cater to schools across all levels and students of all abilities and are well versed in program customization, which can be arranged upon request.

- Mathematics education consultancy services
